Goldleaf LendingNetwork is proud to announce  
the funding of

**Murdock Cement & Stone Company**  
**Industry: Concrete block and cement manufacturing**

Murdock Cement & Stone Company, headquartered in Springfield, IL, is a well-established manufacturer of brick and concrete block that has operated for nearly 100 years.

With economic downturns in the construction and housing industries, Murdock entered its second quarter with a strategic opportunity to switch from manufacturing lower-margin foundation blocks to higher-margin customized bricks. This change in direction was critical to the company's survival, but would require extensive retooling of its manufacturing facility. Murdock needed to refinance existing debt, and with current economic conditions, the credit market was unfavorable to construction companies. To further complicate the situation, the IRS had filed a tax lien on Murdock's assets.

Murdock's bank was unable to help them—however, the bank was a Goldleaf BusinessManager client that knew about Goldleaf's LendingNetwork. The bank referred Murdock to Goldleaf and within the quarter, Murdock Cement & Stone received \$1.2MM in financing from a LendingNetwork partner.

Goldleaf's unique financing arrangement gave Murdock Cement & Stone the opportunity to revitalize and potentially save the company. Our LendingNetwork is your resource link to the most dedicated and responsive alternative funding providers in the industry.
